**Prolong the life
of your vehicle !**

CAT 
Rust stopper

-  **Powerful Rust Suppression**
-  **Suits all Size Vehicles**
-  **Waterproof / Shockproof**
-  **Easy to Install - DIY**
-  **Guaranteed for 10 Years**

WHY CAT?

CAT provides a system, not just a gadget!

Not all electronic rust suppression systems are the same!

A negative electrolysis system like CAT is the ONLY method effective on 'free air structures' like motor vehicles and machinery. You can be assured that everything associated with CAT is quality and with a CAT unit protecting your asset there is nothing in the world that could be doing a better job.

CAT are the leaders in electronic rust prevention with over 25 years of experience built around research, testing and tens of thousands of satisfied customers.

HOW TO PROTECT YOUR INVESTMENT!

THE BEST PROTECTION FROM RUST - GUARANTEED

FEATURES & BENEFITS

- > CAT can slow the spread of new and existing rust by up to 5 times (from test results)..
- > CAT can prolong the life of your vehicle and improve resale value by keeping it "rust free".
- > CAT is compatible with both 12V and 24V electrical systems.
- > CAT is fully waterproof and shockproof (exceeds IEC 529, DIN 40050 and IP67 standards)
- > CAT uses less than 35 milliamps when your vehicle is not running, so it will not send your battery flat.
- > CAT is 100% Australian technology and is designed Aussie-tough for the harshest conditions.
- > CAT will not interfere with automotive electronics or computers. (C-Tick, FCC & E-13 certified)
- > CAT can easily be expanded up to 12 pads at any time after installation.
- > CAT can easily be transferred to your next vehicle.
- > CAT protects the entire vehicle, not just areas which can be sprayed.
- > CAT has even been shown to slow down paint oxidation (fading).

TRIED, TESTED, PROVEN & GUARANTEED

10 YEAR

GUARANTEE

T&C's apply

"I have had one of these systems installed in my last seven cars. When I came to trade them in they were absolutely pristine; inside and under body. My new motor home which is presently under construction deserves one too! Great Product, anyone not using one has no idea what they are missing. Keep on keeping on."

(2015 - Jack - Sunshine Coast QLD)

"The Mechanical Section of the Norfolk Island Regional Council and the former Administration of Norfolk Island have been installing CAT Electronic Ant Corrosion Systems to fleet vehicles since 2013 and have found that the units are extremely effective in the suppression of rust in vehicles fitted."

(2018 - Matthew M - Norfolk Island Regional Council)
